

HSU MYAT WAI MAUNG

FULL STACK SOFTWARE ENGINEER

<https://hsu212.github.io> | (+84)0364514276 | District 7 Ho Chi Minh City.

SUMMARY

Ambitious Computer Science finalist and Full Stack Software Engineer specializing in modern web architecture. Proficient in building scalable, high-performance applications across the stack using JavaScript, TypeScript, Python, and the React/Next.js ecosystem. Adept at designing robust backend APIs with Node.js and managing data with SQL databases, while delivering responsive, pixel-perfect user interfaces. Eager to leverage strong technical foundations in algorithms, system design, and clean code to drive impactful solutions in a Software Engineering role.

WORK EXPERIENCE & PROJECTS

Traffic Signs Detection | Computer Vision & ML System

University Project 2025–2026

- Developed an intelligent computer vision system to automatically detect, classify, and localize road traffic signs from image and video data streams.
- Utilized Python and advanced deep learning/object detection models (e.g., YOLO framework) to ensure high accuracy and real-time processing capabilities.
- Technologies: Python, Deep Learning, Machine Learning, Computer Vision, OpenCV

AuraCycle | Health Tracking Application

Self-made Project 2025

- Designed and developed a responsive health-tracking web application focusing on data privacy and secure user state tracking.
- Technologies: React, TypeScript, HTML, CSS
- Demo : <https://aura-cycle-menstrual-tracker.vercel.app/signin>

SM Home | E-Commerce Platform Architecture

Self-made Project 2025

- Engineered a comprehensive e-commerce platform for furniture retail, featuring scalable component architecture and robust state management.
- Designed seamless API integrations for product discovery, dynamic rendering, and interactive checkout flows.
- Technologies: React, TypeScript, Node.js, HTML, CSS
- Demo : <https://furniture-store-ecommerce-website.vercel.app/>

EDUCATION

Bachelor of Computer Science

Aug 2022 –May 2026

Ton Duc Thang University

- Major in Computer Science

KEY SKILLS & TECH STACKS

- JavaScript,
- TypeScript,
- Python,
- PHP,
- SQL
- React,
- Next.js,
- Vue.js,
- HTML5,
- CSS3, Tailwind CSS
- Node.js,
- English
- Japanese
- Supabase,
- Docker,
- Git, RESTful APIs, PostgreSQL,
- MySQL,
